

**VILLAGE OF OAK PARK
TRANSPORTATION COMMISSION MEETING
MONDAY, APRIL 22, 2019 - 7:00 PM
COUNCIL CHAMBERS – VILLAGE HALL**

AGENDA

1. Call to Order
2. Non-agenda Public Comment - up to 15 minutes
3. Agenda Approval
4. Approval of Draft Transportation Commission Meeting Minutes
 - 4.1 Draft March 25, 2019 Transportation Commission Meeting Minutes
5. EVALUATE KEY INTERSECTIONS FOR PEDESTRIAN SAFETY, SELECT THREE LOCATIONS
 - 5.1 Agenda Item Commentary
 - 5.2 Tabular 36 Month Crash History July 2015 through June 2018
 - 5.3 Photographs, Crash Diagrams, and Crash Report Details for the Seven Preliminary Intersections
 - 5.4 Maps Showing the Crash Locations
 - 5.5 2019-2023 CIP Construction Map with the Seven Preliminary Intersections Highlighted
6. PETITION FOR A TRAFFIC CALMING DEVICE AT THE INTERSECTION OF KENILWORTH AVE. AND LEXINGTON ST.
 - 6.1 Staff Agenda Item Commentary and Background Information
 - 6.2 Petition and Letter of Explanation
 - 6.3 Written Public Testimony
 - 6.4 Scoring Table for the Kenilworth Avenue and Lexington Street Petition
 - 6.5 Aerial View of the Intersection
 - 6.6 Sketch of the Traffic Controls in the Area
 - 6.7 Lincoln School Safe Walking Routes to School Map
 - 6.8 Directional Speed and Volume Data for the 900 & 1000 Blocks of South Kenilworth Avenue and the 830 & 900 Blocks of Lexington Street
 - 6.9 AM & PM Pedestrian and Vehicle Volume Summary Intersection Data
 - 6.10 Kenilworth Avenue and Lexington Street Collision Diagram
 - 6.11 Letter to the Area Residents
7. DISCUSSION ABOUT PENDING TRANSPORTATION COMMISSION AGENDA ITEMS
 - 7.1 Agenda Item Commentary and Pending Agenda Items
 - 7.2 Calendar
8. OTHER ENCLOSURES

OE112 months of P&T traffic item activity summary: April 2018 - March 2019
OE2Village Board action on Trans Com recommendations thru 03/18/2019 inclusive
9. Adjourn

Please call (708) 358-5724 if you are unable to attend

DRAFT Meeting Minutes
Transportation Commission
Monday, March 25, 2018 – 7:00 p.m.
Room 101 – Village Hall

1. Call to Order

Interim Chair Kyle Eichenberger called the meeting to order at 7:00 PM.

Roll Call

Present: Interim Chair Kyle Eichenberger, Garth Katner, James Thompson, Aaron Stigger

Absent: Roya Basirirad, Meghan Moses, Robert Taylor

Staff: Public Works Civil Engineer/Transportation Commission Staff Liaison Mike Koperniak, Jill Juliano, Recording Secretary Kevin Cassidy, Parking Manager Will Gillespie

2. Non-Agenda Public Comment

None

3. Agenda Approval

Commissioner Stigger made a motion to approve the agenda as presented which was seconded by Commissioner Katner. The motion was approved by a unanimous voice vote.

4. Approval of Draft Transportation Commission Meeting Minutes

Commissioner Katner made a motion to approve the February 25, 2019 Transportation Commission meeting minutes without modification.

The motion was seconded by Commissioner Stigger. The motion was approved by a unanimous voice vote.

5. UPDATE ON THE PARKING PILOT

Parking Manager Will Gillespie presented information:

- Pilot Program six month timeline
- Program to be implemented in three phases
- Discussed evaluation measures

Discussion:

Eichenberger inquired about methods for public feedback and inquiry

DISCUSSION (continued)

- Will Gillespie replied with description of communication methods including the Parking Services page on the Village website, e-mail and telephone messages.
 - Information regarding permits and overrides is communicated by direct mail as well as social media.
 - Parking regulations will be less confusing and more uniform Village wide
 - New, simplified parking signs will be rolled out street by street
 - o New signs installed on Maple provide examples
 - Commissioner Thompson asked for clarifications regarding six month period
 - o Gillespie responded that each phase had a six month schedule.
 - Phase 3 begins in April
 - Thompson inquired about the number of spaces added
 - o Gillespie replied that 100 spaces were added to Madison Street and that 50 spaces were added to Marion St.
 - Gillespie replying to Thompson stated that granted permits were increased in Y2, Y3 and Y4
 - Gillespie replied to Stigger stating that CALE payment system was more efficient than older parking meters.
 - Gillespie replied to Thompson that steps were taken to increase police parking enforcement.
 - o Gillespie reported that there are seven Parking Enforcement officers patrolling the Village along with patrols by all officers
 - o Thompson requested a report from Oak Park Police Department regarding parking enforcement
 - Commissioner Katner requested a summary of citizen feedback and Gillespie replied.
 - Parking Manager Gillespie will present the next update at the May meeting of the Transportation Commission
6. PETITION FOR A TRAFFIC CALMING DEVICE AT THE INTERSECTION OF ADAMS STREET AND WISCONSIN AVENUE

- Traffic Engineer Jill Juliano presented detailed report in response to a citizen petition to upgrade a two-way stop at the intersection to an "All Way" stop.
- Juliano reported that traffic counts were proceeding in response to Commissioner Stagger's question regarding critical crash rates.
- Juliano explained rationale of alternating stop sign pattern in response to Commissioner Stagger's question regarding why some intersections have stops signs while others do not.
- Stigger questioned the number of stop signs and asked if all were necessary.
- Juliano discussed stop sign functions considering the problem of rolling stops and the problem of speeding drivers.
- Thompson asked how an intersection qualifies for an all-way stop. Juliano replied with statistics regarding volume of traffic and number of crashes.

- Eichenberger raised questions regarding speeding cars and police enforcement.
- Eichenberger called for increased education regarding stop signs and stopping for school buses.
- Juliano reported that the Village has installed and/or orders "No Parking Here to Corner" signs and also has changed STOP sign plaques to read "Cross Traffic Does Not Stop" rather than Two-way Stop.
- Staff research led to recommendations for the intersection:
 - o Upgrade and/or refresh pedestrian crossing paint to high visibility continental markings.
 - o Add pedestrian crossing signs

6a. PUBLIC TESTIMONY ON AGENDA ITEM #6

- Robert Salm of the 700 block of Wisconsin spoke in support of all-way STOP signs. As a pedestrian he was nearly hit by a car.
 - o Indicated that data did not reflect the reality at the intersection.
- Charlene Schwar of the 700 block of Wisconsin spoke in support of all-way STOP signs.
 - o Stated that present YIELD signs are not effective.
 - o Questioned if traffic counter was in use for a long enough period.
 - o The speed limit is violated consistently
 - o Had questions regarding STOP signs at Adams and Kenilworth
- George Yanos of the 800 block of Wisconsin spoke in support of all-way STOP signs.
 - o Took issue with the nature of the parking restrictions on his block.
 - o Drivers are confused about the route out of the area
 - o Stated that speed remains a problem

Close testimony

The commission discussed:

- 25 mph speed limit and the use of portable speed radar displays
- Criteria that would call for an all-way stop
 - o Rolling stops
 - o Crash frequency, number of crashes
 - o Intersections of streets that have higher speed limits
- Concern for students and/or other pedestrians at Adams and Wisconsin
 - o School bus routes and pedestrian path to and from the bus stop
 - o Pedestrian presence relatively low in comparison to other intersections
- Compare alternative solutions to the all-way stop solution
- Traffic at Rush/Oak Park Hospital as a contributing factor and other traffic flow factors.
 - o Can Village dialog with hospital toward traffic solutions?
- Noted that staff data was at odds with public sentiment.

It was moved by Commissioner Stigger and seconded by Commissioner Thompson to approve the All-way Stop at Adams and Wisconsin; to include continental striping on all four legs of the intersection.

Ayes - Eichenberger, Katner, Thompson , Stigger
Nays - 0

Motion carried by unanimous voice vote

7.REVIEW UPDATE OF VILLAGE'S BICYCLE PLAN AND IT'S IMPLEMENTATION

Engineer Koperniak presented commentary on the development and status of the program.

- Koperniak presented extensive documentation
- Reviewed program goals and outcomes
 - Bike friendly Village
 - Identify streets to designate as bike routes
 - Merge Bike Plan with Capital Improvement Plan and Greenways Development
 - Educate the public
 - Analyze Divvy Bike failure
 - Increased bike sharing
- Koperniak concluded his report and asked the committee to review the materials as the basis for discussion at the May meeting.
- Eichenberger asked about the Bicycle Program's budget
- Koperniak explained that \$200,000 was an estimate.
 - Actual figure would be adjusted to fit actual proposals.
 - Commissioner Thompson asked for a schedule of specific costs toward establishing the budget request.
 - For example, what is the per mile cost of a bike lane?
 - What is the cost of a "hawk" signal?

Eichenberger moved for adjournment and was seconded by Stigger. Meeting adjourned at 8:45 pm.

Kevin Cassidy
Administrative Secretary
Public Works

Village Of Oak Park

Transportation Commission Agenda Item

Item Title: Evaluate Three Key Intersections To Improve A Pedestrian's Safety And Experience (continued from February 25, 2019 meeting)

Review Date: April 22, 2019

Prepared By: Michael Koperniak

Abstract (briefly describe the item being reviewed):

One item on the Transportation Commission's approved 2019 Work Plan is to evaluate three key intersections in order to improve a pedestrian's safety and experience. The expected outcomes are:

- Improve the level of safety for pedestrians moving about in key street intersections.
- Improve the physical environment in key street intersections in order to encourage increased pedestrian usage.

The time frame for this item is to start in the first quarter and finish by the third quarter of 2019.

At its February 25, 2019 meeting, the Transportation Commission reviewed a tabular summary of all of the pedestrian / bicyclist crash reports in the Village for the thirty-six month period of July 2015 to June 2018. The Commission chose seven preliminary intersections for further review. Staff was to collect detailed crash related information for these seven intersections for review by the Transportation Commission at its April 22, 2019 meeting. The purpose of the review is to select the final three intersections for evaluation.

Staff Recommendation(s):

Select three intersections from the seven for evaluation. Start to determine what criteria to use for evaluation purposes. Evaluate these three intersections at future meetings.

Supporting Documentation Is Attached

7 Preliminary locations under consideration are highlighted in yellow

Crash report details for seven intersections as requested by the Transportation Commission at its February 25, 2019 meeting

crash report #	Intersection	date	time	weather	road surface	unit 1			unit 2			narrative	ID
						type	direction	injury	type	direction	injury		
1516419	Oak Park Ave. & Garfield St.	Sat, 07/11/2015	8:45 AM	clear	dry	car	backing into parking space		pedestrian	NB	B	Unit 1 was backing into a parking space. Unit 1 driver exited the vehicle and discovered unit 2 (pedestrian) on the ground. Unit 1 claims he never saw or heard the pedestrian or was aware that the pedestrian was struck. Unit 2 says that he was walking N/B at the curb when unit 1 backed into the parking space. Unit 2 claims that unit 1's passenger side rear struck and pushed him. Video footage of the incident may indicate that unit 2 tripped while walking N/B and fell into the parking space just as unit 1 was backing into it.	1
1606817	Oak Park Ave. & Garfield St. (at east side alley return south of Garfield)	Wed, 10/26/2016	6:00 AM	clear	dry	car	SB turning left into alley		pedestrian	NB	C	Unit 2 (pedestrian) was walking N/B on Oak Park Ave. and was at the mouth of the alley south of Garfield when struck by unit 1 who was turning left into the alley from S/B Oak Park Ave.	2
1702626	Oak Park Ave. & Garfield St. (north of west side alley return south of Garfield)	Sun, 05/07/2017	8:13 PM	clear	dry	car	EB turning left out of alley		pedestrian	WB	C	Crash occurred approximately 100 feet south of the intersection. Unit 1 was driving E/B exiting the alley and making a left turn onto N/B Oak Park Ave. when unit 1 struck unit 2 (pedestrian) who was crossing W/B across Oak Park Avenue. Unit 1 related that she did not observe the pedestrian prior to striking the pedestrian. The pedestrian related that she was crossing Oak Park W/B, heading to her vehicle parked on Oak Park when she was struck by unit 1. Pedestrian related that she did observe unit 1 sitting in the alley prior to crossing but that unit 1 had not begun to turn.	3
1702883	Oak Park Ave. & Garfield St.	Thu, 05/18/2017	12:50 PM	clear	dry	car	NB turning right		pedestrian	NB	B	Unit 1 relates that she was making a right E/B turn from N/B Oak Park Ave onto E/B Garfield. The N/B traffic signal was green and unit 1 thought it was clear to proceed with the turn. As unit 1 was completing the E/B turn, unit 2 (pedestrian) suddenly appeared in front of unit 1 and she was unable to stop in time to avoid striking the pedestrian that was crossing Garfield N/B. Unit 2 relates that she was crossing Garfield N/B at Oak Park Ave. in the crosswalk with the green traffic signal when unit 1 making an E/B turn onto Garfield from N/B Oak Park struck her.	4
1802124	Oak Park Ave. & Garfield St.	Thu, 04/12/2018	7:27 AM	clear	dry	car	EB		bicyclist	NB	A	Unit 1 was traveling E/B on Garfield through the Oak Park Ave intersection. Unit 2 (bicyclist) was crossing N/B in the Oak Park Ave crosswalk from the S/E corner of Garfield/Oak Park Av when the E/W Garfield traffic light was red. It was at this time when unit 2 was struck by unit 1 who was traveling E/B on Garfield through the intersection.	5
1802594	Oak Park Ave. & Garfield St.	Wed, 05/02/2018	4:52 PM	rain	wet	car	NB turning right		pedestrian	SB	B	Unit 2 (pedestrian) was crossing Garfield S/B on Oak Park Av. with the signal when unit 1 made a right hand turn from Oak Park onto E/B Garfield and struck unit 2 while the pedestrian was in the crosswalk. Unit 1 left the scene traveling E/B on Garfield.	6

1600251	Lake St. & Scoville Ave.	Thu, 01/14/2016	7:36 AM	clear	wet	car	SB		pedestrian	Standing still	C	Unit 2 (uniformed crossing guard) was standing in the crosswalk assisting students crossing Scoville Avenue. S/B unit 1 was stopped north of the crosswalk waiting while the students crossed. Apparently unit 1 became impatient, with the driver allegedly shouting to unit 2 that he was late for work. Unit 1 proceeded into the crosswalk and struck the crossing guard. Unit 1 drove away from the scene.	7
1605165	Lake St. & Scoville Ave.	Sat, 08/13/2016	5:03 PM	clear	dry	car	WB turning SB		pedestrian (skateboarder)	EB	B	Driver of unit 1 related she was turning S/B onto Scoville off of Lake St when she struck unit 2 (skateboarder) as he was skateboarding E/B in the crosswalk. The driver further related that unit 2 attempted jumping out of the way.	8
1606986	Lake St. & Scoville Ave.	Wed, 11/02/2016	4:53 PM	rain	wet	car	EB		bicyclist	SB	B	Unit 2 (bicyclist) related he was riding his bicycle slowly S/B on Scoville crossing Lake in the crosswalk when unit 1 traveling E/B on Lake struck his bicycle. Driver of unit 1 related she was traveling E/B on Lake at Scoville when she struck unit 2 as he crossed the street. Driver of unit 1 related she was traveling at a slow pace, but did not see unit 2.	9
1704083	Lake St. & Scoville Ave.	Sat, 07/08/2017	4:55 PM	clear	dry	car	WB turning SB		bicyclist	EB	A	Unit 1 was W/B on Lake turning S/B onto Scoville when she struck unit 2 (bicyclist) who was riding E/B on Lake. Witness states he observed unit 1 W/B on Lake turn suddenly "cutting off" unit 2 and striking him.	10
1801381	Lake St. & Scoville Ave.	Fri, 03/09/2018	7:35 AM	clear	dry	car	EB		bicyclist	NB	B	The driver of unit 1 related while driving E/B on Lake St. at Scoville Ave. she observed the OPRF HS crossing guard in the center of the intersection with her stop sign not yet raised. Unit 1 proceeded to enter the crosswalk causing unit 1 to collide with unit 2 (bicyclist). The crossing guard stated she was standing in the crosswalk with her stop sign raised for E/B Lake St. traffic when unit 1 entered the crosswalk and struck unit 2.	11

1516956	Oak Park Ave. & Augusta St.	Tue, 07/14/2015	3:30 PM	clear	dry	car	EB		bicyclist	EB	O	This crash occurred approximately 50 feet east of the intersection and was not intersection related. The driver of unit 1 related that she was travelling E/B on Augusta from Oak Park Ave when she observed and passed a bicyclist who was E/B on Augusta in the bicycle lane. As unit 1 passed the bicyclist she heard and felt the bicycle sideswipe the passenger side of unit 1. Both parties stopped to make sure that the bicyclist was OK. The rider of unit 2 related that she was fine and the parties did not exchange information or call the police to the scene. The driver of unit 1 subsequently came to the police station to report the crash so that she could file an insurance claim.	21
1606598	Oak Park Ave. & Augusta St.	Mon, 10/17/2016	3:02 PM	clear	dry	bicyclist	EB	B	church bus	EB		Driver of unit 2 was E/B on Augusta approaching Oak Park Ave when she observed unit 2 (bicyclist) "swerve" at which time she heard a "thump" to the rear area passenger side of her bus. The reporting officer observed leaves against the curb and could see the bicycle's tread and it appears the bicyclist struck the curb and then over-corrected and struck the bus. The officer spoke to unit 2 (bicyclist) who related that he was riding E/B on Augusta and knew he was close to the bus and curb but thought he could get by. The bicyclist further related he then struck something, lost his balance, and over-corrected and fell into unit 1.	22
1703492	Oak Park Ave. & Augusta St.	Thu, 06/15/2017	12:30 PM	clear	dry	car	WB turning SB		bicyclist	EB	B	Unit 2 (bicyclist) related that he was crossing Oak Park Ave E/B in the crosswalk on the south side of Augusta. He further related that unit 1 made a left turn from W/B Augusta onto S/B Oak Park and struck unit 2. The driver of unit 1 stopped to check on the condition of unit 2 and then left the scene of the crash.	23

Village Of Oak Park

Transportation Commission Agenda Item

Item Title: Petition for a Traffic Calming Device at the Intersection of Kenilworth Avenue and Lexington Street

Review Date: April 22, 2019

Prepared By: Jill Juliano

Abstract (briefly describe the item being reviewed):

On October 31, 2018, the Village of Oak Park received a petition to implement traffic calming measures at the intersection of Kenilworth Avenue and Lexington Street.

At tonight's meeting, the Commission may recommend to: approve the petition, deny the petition, or recommend an alternative solution to address the petitioner's concerns.

Staff Recommendation(s):

Village staff recommends tabling the petition until after modification of the traffic signals on Garfield Street at Oak Park Avenue when traffic data for the Kenilworth Avenue and Lexington Street intersection based on the anticipated new traffic patterns can be collected and provided to the Transportation Commission for review and recommendation.

Supporting Documentation Is Attached

Memorandum

Date: April 17, 2019

To: The Transportation Commission

From: Jill Juliano, Transportation Engineer JJ

Re: Background Information Related to the Petition for the Implementation of a Traffic Calming Device at the Intersection of Kenilworth Avenue and Lexington Street

On October 31, 2018, the Village of Oak Park received a petition to install a traffic calming device at the intersection of Kenilworth Avenue and Lexington Street. Residents representing 67.0% of the street frontage on the petitioning blocks signed the petition. The petition was certified as a valid petition.

In the letter of explanation, residents suggested the intersection be upgraded from two-way to all-way STOP-controlled intersection. Reasons provided for the petition are: concern for pedestrian safety at the intersection especially children and families as they walk to and from Lincoln School; heavy traffic on Lexington Street due to motorists looking for alternatives to Garfield Street, Roosevelt Road and Harvard Street during drop-off and pick-up time periods; and speeding vehicles. See Exhibit 6.2 for a copy of this petition and accompanying letter of explanation.

See Exhibit 6.3 for written public testimony received by the Village of Oak Park regarding this item. There are 2 emails in support of the petition and 2 emails opposed to the petition.

A directional twenty-four hour traffic volume and speed study was conducted on Thursday, March 14, 2019 for the 900 & 1000 blocks of South Kenilworth Avenue and 830 & 900 blocks of Lexington Street. See Exhibit 6.8 page 1 for a summary of the results. Source data is also included in Exhibit 6.8 pages 2-13.

A collision diagram for the intersection of Kenilworth Avenue and Lexington Avenue was generated on April 12, 2019. See Exhibit 6.10 for the collision diagram.

Next, staff completed the scoring table for the traffic calming petition. See Exhibit 6.4 for the scoring table. A numerical score is calculated for six measures that are typical reasons for a petition to be submitted. The maximum possible score is 100 points. A minimum score of 25 points is required to bring a petition before the Transportation Commission.

For this petition, fifteen points were awarded for vehicle volumes entering the intersection in a 24-hour time period, 1,959 vehicles (vehicle volume measure) and another fourteen points were for proximity of the intersection to Lincoln School, Carroll Park and Recreation Center, CTA Blue Line Oak Park station, and Harvard Congregational Church (pedestrian traffic generators). Eleven points were given for signatures on the petition represented 67.0% of the street frontage (community interest measure) and three points were awarded because this intersection is not identified as a proposed bike route/boulevard (bike routes/non-bike routes measure).

Memorandum

The total score for the intersection of Kenilworth Avenue and Lexington Street is 43 points. The score for this petition exceeds the minimum score (25) necessary to submit the petition to the Transportation Commission for review and recommendation.

See Exhibit 6.5 for digital aerial photographs of the Kenilworth Avenue and Lexington Street intersection and the neighboring area; as well as an up-close aerial view of the intersection. Both Lincoln School and Carroll Park is one block south of the intersection. The Harvard Congregational Church is less than a block to the south of the intersection. THE CTA Blue Line Oak Park station is two blocks to the east and one and a half blocks to the north of the intersection. The Kenilworth Avenue and Lexington Street intersection is north-south STOP controlled.

Exhibit 6.6 shows the traffic control devices on Lexington Street between Maple Avenue and Oak Park Avenue as well as neighboring east-west streets, Garfield Street, Harvard Street, and Fillmore Street.

Exhibit 6.7 is a copy of Lincoln School's Safe Walking Route to School map with a yellow box around the Kenilworth Avenue and Lexington Street intersection. The route on the map indicates crossing east/west across Kenilworth Avenue on the north leg of the intersection with the protection of the traffic control device (north-south STOP signs). The route on the map also indicates crossing north/south across Lexington Street at Grove Avenue on the east and west legs of the intersection, again with the protection of the traffic control device (east-west STOP signs) to travel down to Lincoln School.

Reviewing the 24-hour volumes (Exhibit 6.8), the average daily traffic on the 900 & 1000 blocks of South Kenilworth Ave was 188 and 267 vehicles, respectively. The Kenilworth Avenue volumes fall below the 800 to 1,200 vehicle range for typical average daily traffic volume on the Village's residential streets. For the 830 & 900 blocks of Lexington Street, the average daily traffic was 1,763 vehicles and 1,696 vehicles, respectively.

Lexington Street volumes are above the typical 800 to 1,200 vehicle range for average daily traffic volume on the Village's residential streets. There are a couple of factors contributing to the elevated volumes for Lexington Street in this area. They are: 1) congestion on Garfield Street at Oak Park Avenue for eastbound traffic especially during AM peak hours, and 2) Harvard Street is temporarily closed to vehicle traffic between Kenilworth Avenue and Grove Avenue during Lincoln School drop-off and pick-up time periods per the Lincoln School Traffic Safety Plan. As a result, some motorists use alternate east-west routes, which include Lexington Street, to avoid those areas.

As one of its construction projects for this year, the Village is scheduled to modify the Garfield traffic signals at Oak Park Avenue to provide a protected left turn phase to alleviate congestion at this intersection. It is expected this improvement will be completed by September 2019. Village staff anticipates that a portion of the traffic that currently travels on Lexington Street will migrate to Garfield Street thus reducing traffic volumes on Lexington Street.

Memorandum

Regarding vehicular speeds, it is an accepted traffic engineering practice to set the speed limit to the 5 mile per hour (mph) increment above or below the 85th percentile speed. Village Staff holds the opinion that the majority of drivers will drive at or near the posted speed limit. In addition, it is an accepted fact that the speed indicated on speedometers can vary up to 2 percent above or below the actual speed of the vehicle.

By definition, the 85th percentile speed is the speed at which 85 percent of the vehicles are traveling at or less than. Conversely, 15 percent of the vehicles will be traveling faster than the 85th percentile speed. It has already been stated that speed limits are typically set to the 5 mph increment above or below the 85th percentile speed. This implies that it is expected that approximately 15 percent of vehicles will be traveling faster than the speed limit, if the speed limit is in the 5 mph increment below the 85th percentile speed.

Looking at the 85th percentile speeds for all four blocks of the intersection (the 900 & 1000 blocks of South Kenilworth Avenue and the 830 and 900 blocks of Lexington Street, the directional speeds for the four blocks range between 24 and 25 miles per hour (mph). The 24-hour survey showed that 10.6% of the northbound vehicles and 17.0% of the southbound vehicles on the 900 block of South Kenilworth Avenue were traveling faster than the posted 25 mph speed limit. For the 1000 block of South Kenilworth Avenue, the percentage of vehicles traveling faster than the posted 25 mph speed limit were 14.9% for northbound traffic and 15.1% for southbound traffic.

Looking at the 85th percentile speeds for the 830 & 900 blocks of Lexington Street, the 24-hour survey showed that 10.5% of the eastbound vehicles and 15.0% of the westbound vehicles on the 830 block of Lexington Street were traveling faster than the posted 25 mph speed limit. For the 900 block of Lexington Street, the percentage of vehicles traveling faster than the posted 25 mph speed limit were 15.6% for eastbound traffic and 17.6% for westbound traffic.

Based on the collected traffic data, it appears there is not a speeding issue on any of the four blocks studied (the 900 & 1000 blocks of South Kenilworth Avenue and the 830 and 900 blocks of Lexington Street).

Also note that the Manual on Uniform Traffic Control Devices lists that STOP signs should not be used for speed control. Studies have shown there is little or no effect on vehicle speeds on residential roads after the installation of STOP signs. Vehicle speeds are reduced within 150 feet of the intersection otherwise the effect of STOP signs on vehicle speeds is negligible. Some motorists increase their speed to make up for the "inconvenience" of stopping, or make a "rolling stop" at the intersection, or disregard the STOP signs.

Exhibit 6.9 provides a summary of the number of pedestrians crossing any of the Kenilworth Avenue and Lexington Street intersection's four legs during the 7:00AM-9:00AM and 2:00PM-4:00PM time periods. Also included in the summary is the number of vehicles traveling through the intersection during these same time periods. For the morning peak hour, 57 pedestrians crossed Kenilworth Avenue at the intersection while 82 vehicles traveled on Kenilworth Avenue through the intersection. During the same time period, 25 pedestrians

Memorandum

crossed Lexington Street at the intersection while 729 vehicles traveled on Lexington Street through the intersection.

In the afternoon two hour time period (2PM-4PM), 18 pedestrians crossed Kenilworth Avenue while 100 vehicles traveled along Kenilworth Avenue through the intersection. During the same time period, 11 pedestrians crossed Lexington Street at the intersection while 616 vehicles traveled along Lexington Street through the intersection. Also included in this exhibit is the pedestrian source data.

Next, thirty-six months of vehicle crash reports covering the period of January 2016 through December 2018 were reviewed for the Kenilworth Avenue and Lexington Street intersection. Please see Exhibit 6.10 for the collision diagram.

In 1997, the intersection was studied as part of the Village-wide traffic study. The Kenilworth Avenue and Lexington Street intersection is north-south STOP-controlled intersection. The number of reported crashes at the intersection in the 36 month period ending December 1996 totaled zero, while the average daily traffic was 1,802 vehicles. The 1997 crash rate for the Kenilworth Avenue and Lexington Street intersection was calculated to be 0.000 accidents per million entering vehicles (Acc/MEV). This crash rate is then compared to the critical crash rate for the particular section of the Village's area-wide traffic study. For the south section of the area-wide traffic study (I-290 Expressway to Roosevelt Road and Harlem Avenue to Austin Boulevard), the critical crash rate was 0.94 Acc/MEV. If an actual accident rate exceeds the critical crash rate then it is highly probable that the accidents were caused by factors other than chance.

The number of reported crashes that occurred at the Kenilworth Avenue and Lexington Street intersection for the thirty-six months ended December 31, 2018 totaled zero. The average daily traffic for the intersection as determined as part of the 2019 traffic study was 1,959 vehicles. From this data, the 2018 crash rate for the Kenilworth Avenue and Lexington Street intersection is calculated to be 0.000 Acc/MEV. This crash rate is below the critical crash as determined in the area-wide traffic study of 1997. In conclusion, there does not seem to be a problem with vehicle crashes at the intersection of Kenilworth Avenue and Lexington Street.

Village staff recommends tabling the item until after the modification of the traffic signals on Garfield Street at Oak Park Avenue when staff can collect traffic data based on new traffic patterns. With the new data, staff would bring back the item to the Transportation Commission for their review and recommendation.

PETITION FOR TRAFFIC CALMING MEASURES

We, the undersigned, respectfully petition the Transportation Commission to recommend to the Oak Park Board of Trustees that traffic calming measures be implemented:

on the _____ block of _____ or

at the intersection of KENILWORTH AVE and LEXINGTON AVE
in the Village of Oak Park.

Traffic problems to be remedied by the use of traffic calming measures include:

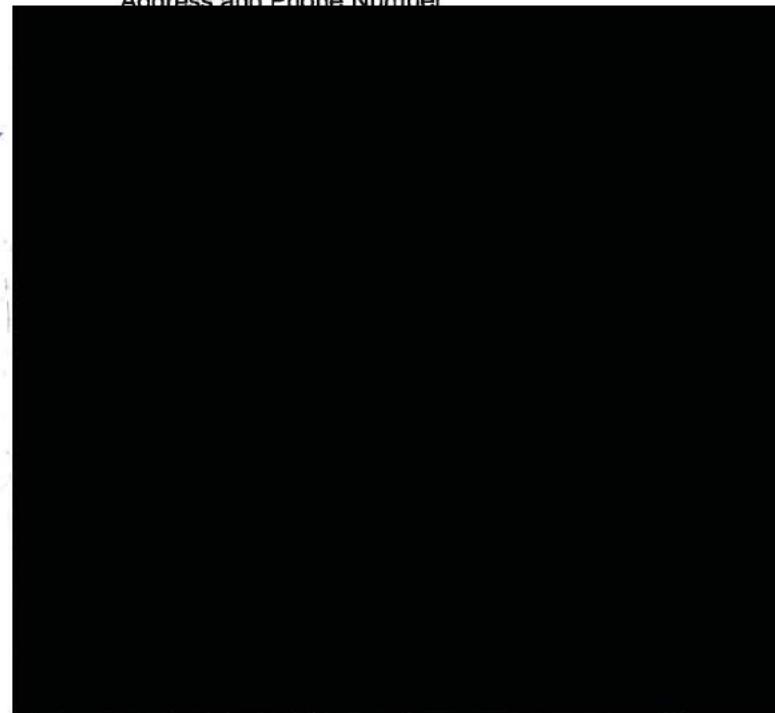

- | | | |
|--------------------------------------|----------|--|
| • Excessive vehicle crashes | <u>5</u> | (rank these in order of importance with 1 being most problematic and 5 being least problematic) |
| • Excessive vehicle speeds | <u>3</u> | |
| • Excessive vehicle volumes | <u>4</u> | |
| • Pedestrian/Bicyclist safety issues | <u>2</u> | |
| • Other <u>1 Block From School</u> | <u>1</u> | |

The Transportation Commission, Attn: Jill Juliano
The Village of Oak Park
Public Works Center
201 South Blvd. Oak Park, IL 60302

Dear Jill,

Please see the attached Petition for Traffic Calming Measures at the intersection of S. Kenilworth and Lexington in Oak Park. Our neighbors on Kenilworth and Lexington overwhelmingly agree that this intersection is a safety concern, primarily for pedestrians.

Currently, there is a two-way stop at Kenilworth and Lexington. The two existing stop signs face Kenilworth, so north/south traffic must stop. East/west traffic along Lexington does not stop. Lexington is by far the busier of the two streets, and traffic on Lexington can be heavy during the morning and afternoon/evening rush hours. Motorists on Lexington are often looking for alternatives to the busiest east/west roads such as Roosevelt and Garfield. Often, these motorists are going at or above posted speed limits on Lexington. It can be nerve-wracking for adults to safely walk across Lexington at Kenilworth, and for children this intersection is hazardous.

One of our biggest concerns is the safety of children and families walking to and from school. The intersection of Kenilworth and Lexington is only 1 block from Lincoln School and Carroll Park. Additionally, middle school children are walking from this neighborhood to go north to Brooks Middle School.

Here are some additional considerations related to this intersection and the proximity to Lincoln School:

- Traffic on Lexington is particularly heavy during the same hours when children are walking to and from school.
- Nearly 700 children attend Lincoln School. Many of these children walk to school, while others are driven to school by parents, thus increasing traffic. The 1000 block of Kenilworth is a commonly used block for parents to park while dropping off and picking up from school.
- While Lincoln School's address might technically be on S. Grove, students do NOT enter or exit the building on Grove. The dropoff and pickup areas for all grades are located on the west side of the building nearest to Kenilworth and Harvard.
- Lincoln School busses use Harvard Ave before and after school. Many commuters know this and use Lexington as an alternative to Harvard. Other motorists are forced north on Kenilworth to Lexington because Harvard is closed from Kenilworth to Grove before and after school.

My husband and I do have children that currently attend Lincoln School, and this is of course a big reason why this intersection is important to us. However, we assume our children will be nearly finished with their time at Lincoln before any traffic calming measures might be implemented. We are still pursuing this for the safety of everyone else. We have experienced how difficult it can be to cross Lexington, and even as 5th graders we won't be letting our children walk to school without us because of this intersection.

We believe installing stop signs or a flashing pedestrian walkway on Lexington at Kenilworth would slow down traffic and increase safety for all pedestrians and motorists. We don't want to wait until someone gets hurt before we pursue Traffic Calming Measures for this intersection.

Thank you very much for your time and consideration.

Best Regards,

April Johnson

Subject: Traffic calming device at Kenilworth and Lexington

Hello Mr. Juliano,

I will not be able to attend the public meeting which will be held on April 22, and as such I am sending my comments in regard to the subject of the meeting this way.

I am writing in response to the notice I have received with regard to the consideration of a petition to implement a traffic calming device at the intersection of Kenilworth and Lexington. I have lived at ████████ S Kenilworth, which is at the █████ corner of said intersection, since June 200. In all this time, I have not noticed any need for a traffic calming device at this intersection. While there is always an odd driver who seems to be revving his/her car's engine while moving between Clinton and Grove, such cases are few and far between, and definitely do not justify the addition of any device along Lexington. As you are well aware, nowhere else along Lexington, between Harlem and East, are there additional such devices beside the alternating Stop signs. Transforming the intersection into a 4-way Stop type would only contribute to an increase in pollution (both air and sound), as traffic would have to come to a complete stop on both the E-W and N-S directions, and starting after a full stop both uses more fuel and emits more pollutants in the air and creates more noise.

Sincerely,

Mircea Pigli

Subject: Traffic calming measures

Received the letter about a traffic calming device at Kenilworth Avenue and Lexington Street, and after multiple attempts to access the “Traffic Calming Toolbox”, and getting “page not found” I thought I’d drop a line to say the only acceptable solution in my mind (without seeing what you’re offering) is a Stop sign.

We lived in Chicago all our lives until 2013 and probably the biggest bonus to moving here was getting AWAY from speed bumps on streets and alleys and ridiculous weed filled traffic circles. Talk about adding to your stress level - especially in winter! Our village equipment will be battered up after one bad winter - has anyone thought of the ramifications of that expense? When we’re trying to hold down on taxes?

Make no mistake you would open a Pandora’s Box because if one speed bump goes in, the Whole Village will be carrying the torches for a speed bump for Their Dangerous Intersections. That is the Blueprint from our southwest side community in Chicago. It literally spread like wildfire and where pray tell will that money come from when it happens here?

I hope I’m jumping the gun and speed bumps are NOT a consideration. When we first moved in, a neighbor brought up the issue to me and I gave her an earful about “be careful what you wish for”. Thank goodness she wasn’t successful back then because now she lives in Indiana!

Subject: Public comments for 4/22

I am writing in support of a traffic calming measure for Kenilworth and Lexington (preferably a stop sign). We live at [REDACTED] S Kenilworth and cross that intersection to take my daughter to school and it would feel a lot safer with a stop sign. We are 244 feet from the school and it makes sense to keep traffic that close to an elementary school slower.

Thank you,

Abinoja Family

To Whom it May Concern:

I am in favor of a 4-way stop sign at the corner of Lexington and Kenilworth. I live at [REDACTED] Kenilworth Ave, Oak Park, IL 60304, on the [REDACTED] corner. This was the scene that I walked into as I came out my front door on February 20, 2019 at 8:20 am. I heard a crash and went out to see if everyone was OK. Had this been 30 minutes earlier, multiple adults and children walking to Lincoln could have been struck, including me, my husband and son. Cars race through this intersection as it is often a thoroughfare for the Eisenhower expressway. Please put in a 4-way stop sign at this corner, as well as the other corners that were addressed in the letter, to help prevent further accidents.

Sincerely,

Susan Fox

RE: PETITION TO IMPLEMENT A TRAFFIC CALMING DEVICE AT THE INTERSECTION OF KENILWORTH AVENUE AND LEXINGTON STREET

Dear Resident or Business Owner:

The Village of Oak Park has received a petition to implement a traffic calming device at the intersection of Kenilworth Avenue and Lexington Street.

The Transportation Commission may consider traffic calming measures from the Village's Traffic Calming Toolbox during its review. Below is the URL address to the Village's webpage showing a matrix of the 32 traffic calming measures in the Toolbox:

https://www.oak-park.us/sites/default/files/public-works/matrix_table.pdf

The Transportation Commission is scheduled to review this petition at its upcoming public meeting being held at 7:00 PM on Monday, April 22, 2019, in the Council Chambers of Village Hall.

You are invited to attend this public meeting to give testimony. If you wish to comment but are unable to attend, you may submit your comments in writing to the undersigned by U.S. mail, by fax to (708) 434-1600, or by email at transportation@oak-park.us. All comments must be received by Wednesday, April 17, 2019 at 12:00 noon for inclusion in the Commission's agenda.

A copy of the Transportation Commission's agenda will be posted on the Village of Oak Park's website (www.oak-park.us) on Thursday, April 18th after 5:00PM for public review and inspection.

Sincerely,

THE VILLAGE OF OAK PARK

Transportation Commission Agenda Item

Item Title: Pending Transportation Commission Agenda Items

Review Date: April 22, 2019

Prepared By: Michael Koperniak

Abstract (briefly describe the item being reviewed):

The Transportation Commission typically reviews and make recommendations on items presented to it from four sources: (a) resident generated petitions, (b) Village Staff, (c) Transportation Commission Work Plan, and (d) Village Board of Trustees.

The Transportation Commission typically holds its public meetings on the fourth Monday of the month. The Commission has for many years had a policy of keeping its agenda at three items or less in order to not have the meeting extend beyond three hours in length.

In the past when necessary, the Commission has held two meeting per month in order to review and make recommendations in a timely fashion on pending agenda items. These meetings have typically been held on the second Monday of the month.

Attached is a listing as of April 22, 2019, of pending Transportation Commission agenda items along with a calendar highlighting the remaining April through December meeting dates.

Staff Recommendation(s):

Review the pending agenda items and if desired decide if one or more second monthly meetings would be appropriate. Staff will be available to discuss the pending items.

Supporting Documentation Is Attached

Pending Transportation Commission agenda items as of April 22, 2019

April

1. Lexington & Kenilworth traffic calming petition
2. Evaluate key intersections for pedestrian safety, select three locations
3. Discussion about pending Trans Com agenda items
 - poll commission to see if they want to hold two monthly meetings

May

1. one of the two parking study updates
 - a. update on parking pilot, part II
 - b. unified parking technology update
2. petition to remove permit parking on the 1150 S. Elmwood block
3. one of the two traffic calming petition
 - a. 1150 Home Avenue TC petition
 - b. Holmes School traffic safety plan

June

1. detector loop update
2. Z3 permit extension parking zone
3. other of the two traffic calming petitions
 - a. 1150 Home Avenue TC petition
 - b. Holmes School traffic safety plan

Pending items still to be assigned to an agenda:

- the one of the two parking study updates
 - a. update on parking pilot, part II
 - b. unified parking technology update
- Bicycle work plan items continuation
- present draft NTMP for review and comment
- 500 block of S Harvey Ave traffic calming petition (data collection to be scheduled)
- 600 block of N Euclid Ave traffic calming petition (data collection to be scheduled)
- 800 block of N Cuyler Ave traffic calming petition (data collection to be scheduled)

FYI - there are two more submitted petitions in the pipeline that are awaiting additional signatures

Memorandum

Date: April 22, 2019

To: Transportation Commission

From: Mike Koperniak, Engineering Division _____

Re: Village Board of Trustees action on Transportation Commission recommendations thru 03/18/2019 inclusive

The Village Board of Trustees did not review any Transportation Commission recommendations at its March 18, 2019 meeting.
